

North Canyon Rd./UT-146/100 East State Street to SR-92

North Canyon Road will undergo extensive pavement replacement for the entire length of the roadway from State Street in Pleasant Grove to SR-92 in Cedar Hills. A layer of old pavement will be scraped off and replaced from 2600 North to SR-92, and the entire roadway from State Street to 2600 North will be demolished and replaced. The project will also include the replacement of two waterlines, storm drain work, a traffic signal at 1100 North, the installation of a new data fiber line throughout the length of the project and the addition of sidewalks, curb and gutter in some areas. The new pavement will extend the life of the roadway and will result in a smoother and safer ride, and the utility work will upgrade and enhance the infrastructure and accommodate future growth.

- Work is scheduled to begin on Monday, March 19th, and is tentatively planned to be completed by mid-October 2018. Work hours will be from 7 a.m. to 7 p.m., Monday– Saturday, with occasional night work and Sunday work as needed.
- During construction, some areas of North Canyon Road will be closed except to local traffic. At times traffic will be reduced to one shared lane with signal lights or flaggers directing traffic. **There will be extensive impacts to the roadway; please use alternate routes whenever possible.**
- For your safety as well as that of the construction crews, please slow down and watch for workers and slow-moving vehicles.
- **Keep away** from construction equipment and out of the construction zone; take care to keep children and pets out of the construction zone as well.
- **Note:** Schedules are subject to change due to weather and materials availability.
